

FLUID MANAGEMENT SYSTEMS

WATER TRANSFER & HYDRAULIC FRACTURING

www.MPCCONTAINMENT.com

an ISO 9001:2008 company

MPC Containment has customized and manufactured **over 19,000,000 barrels** worth of Collapsible Storage Tanks in the last decade. Our tanks perform under the most challenging conditions, and in the harshest climates, for costs that leave our competition behind.

Experience sets MPC apart; durability and economy make our tanks the best solution on the market for Exploration and Production.

WHY USE MPC CONTAINMENT COLLAPSIBLE STORAGE TANKS?

LOGISTICAL ADVANTAGE

- 25,000 barrels of storage ship on one flatbed trailer, and arrive on-site within days
- Deploy nearly 12,000 barrels of storage per hour using only one all-terrain forklift
- Fewer trucks mean less road damage and increased safety
- 5,000 BBL MPC Tanks mean fewer connections than steel tanks, less hosing, and less leakage
- MPC Field Technicians are available for on-site services and support

ENVIRONMENTAL & POLITICAL ADVANTAGE

- No site-prep required in most cases
- Support better community relations with fewer trucks, low visibility from off-site, and a smaller environmental footprint than other systems
- No risk of water contamination or wildlife endangerment
- Avoid liner disposal and permit issues associated with open-air or in-ground systems

COST ADVANTAGE

- Spend less per barrel on MPC Fluid Management Systems than on any other system
- Buy or lease, reuse at multiple sites, or resell tanks for added cost-efficiency
- Employ fewer laborers and contract less equipment than steel tanks
- Never worry about evaporation and water replacement costs
- Freeze management is simple and cost-effective

CUSTOMIZATION IS THE CORNERSTONE OF OUR BUSINESS.

MPC manufactures tanks capable of holding from 1,000 gallons to over 5,000 barrels of fluid. But the hallmark of our service is customization; we know first hand that no two work sites are alike, so we provide solutions tailored to the needs of our individual clients. MPC Containment is unique in the market for our robust engineering know-how, our unbeatable lead times, and our vast experience manufacturing tanks for every condition, all over the world.

Customize each individual tank or the layout and footprint of your entire depot.

ENGINEERING EXPERIENCE SETS MPC CONTAINMENT APART

MPC'S PATENTED ROUNDED CORNER TANKS

- Rounded corners redistribute shell stress uniformly throughout the tank
- Patented design dramatically reduces the possibility of leaks, unlike the standard pinched corners used by our competition
- MPC Tanks are designed to withstand the pressure of a taller profile, making the footprint of an MPC Collapsible Storage Tank the smallest in the field per barrel
- Each tank is thoroughly leak and stress tested inside and out by trained technicians

ROUNDED CORNERS REDUCE RISK OF LEAKAGE

TACTICAL PIPELINE SYSTEMS

- Designed to meet rapid deployment and retrieval requirements of the U.S. Military
- Systems can cover miles of terrain, eliminating need for water transfer trucks
- Utilizes lightweight Lay Flat Hose with an inner tube, an intermediary reinforcement, and an outer cover
- Systems include Base Units (cradles that hold Hose Reels and mount to truck bed), Power Units (motors that turn reel for deployment and retrieval), and Interconnection Kits; Systems can be custom designed
